

Ravani Roshan

AI Full-Stack Developer · LLM Product Engineer · Backend-First Web Builder
Ahmedabad, Gujarat, India · +91 91060 95375 · ravaniroshansingh@gmail.com · github.com/RavaniRoshan

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate focused on AI-integrated full-stack development, LLM-powered products, backend APIs, developer tools, and browser extensions. Built end-to-end AI products including a hermetic multi-agent coding system, an AI-powered GitHub App with payment flows, and an intelligent PDF-reading browser extension. Experienced with TypeScript, React, Next.js, Rust, Python, FastAPI, Node.js, PostgreSQL, Docker, and LLM API integration.

EDUCATION

Silver Oak University <i>B.Tech, Computer Science Engineering</i>	Ahmedabad, Gujarat, India <i>CGPA: 8.0</i>
---	---

EXPERIENCE

Google Developers Group <i>Core Developer</i>	Oct 2023 – Dec 2025 <i>Ahmedabad, Gujarat, India</i>
- Led engineering sessions for a 200+ developer community on full-stack development, AI tooling, LLM API integration, and deployment workflows. - Mentored peers on building maintainable applications with React/Next.js, Python, TypeScript, databases, and LLM-powered workflows. - Contributed to community projects across web infrastructure, applied ML, and developer platforms.	

PROJECTS

Niki – Hermetic Multi-Agent Coding System <i>Rust, Docker, CLI, Multi-agent, LLM</i>	Jul 2026 – Present
- Built an end-to-end multi-agent coding system in Rust: CLI interface → Docker sandbox orchestration → LLM agent loops → reviewable git branch delivery. - Designed the full pipeline from user task input through autonomous agent planning, code generation, test execution, and code review.	
Commitboy – AI-Powered GitHub App <i>Next.js, TypeScript, Groq, Redis, Razorpay</i>	Feb 2026 – Present
- Built a full-stack AI GitHub App that auto-generates CHANGELOG.md via LLM commit summarization with webhook processing, rate limiting, and subscription management. - Built frontend pages for onboarding, pricing, docs using Next.js, TypeScript, Tailwind CSS, and shadcn/ui. - Integrated Groq LLM inference, GitHub API, Vercel serverless, Redis/KV, and Razorpay payments.	
OPEN_PDX – AI-Assisted PDF Reading Browser Extension <i>JS, HTML, CSS, Chrome APIs</i>	Apr 2026 – Present
- Built a browser-based PDF reader rewriting complex documents into Normal, Simple, and Technical modes. - Implemented extension architecture with reader-tab flow, content scripts, background logic, PDF sync, and Markdown rendering. - Added stealth peek mode, multi-column text safeguards, and scanned-document detection.	
Kimi Agent Mnemo – Cinematic Landing Page <i>React, TypeScript, Vite, Three.js, GSAP</i>	May 2026 – Present
- Built a high-performance AI-product landing page using React, TypeScript, Vite, Three.js/WebGL, GSAP, and Lenis. - Implemented immersive UI with 3D memory grids, particle systems, scroll-triggered animations, and glassmorphism effects.	

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, HTML, CSS, Vite, responsive UI, browser extensions
Backend: Python, Rust, FastAPI, Node.js, Express, REST APIs, WebSockets, serverless, GitHub webhooks
AI/Product: LLM APIs, Groq, LangChain, LangGraph, MCP, RAG, prompt/tool tracing, agent observability
Databases: PostgreSQL, MySQL, Supabase, SQLite, Redis/Vercel KV
Infrastructure: Docker, Docker Compose, Vercel, Railway, Fly.io, AWS, GCP, GitHub Actions

CERTIFICATIONS

Google: MLOps for Generative AI (Dec 2025), Responsible AI: Privacy & Safety (Jan 2026)

DeepLearning.AI: LangChain for LLM Application Development

Anthropic: Claude Code in Action (Mar 2026)

freeCodeCamp: Front End Development Libraries (Feb 2025), Foundational C# with Microsoft (Nov 2024)
